DATA & QUANTITATIVE ANALYST

Hi, I'm Arthur Yamin.
I bridge data engineering, AI, and financial markets.

Results-driven analyst certified in AI (CAIP), Data Science (CDSP), and Financial Market Analysis (WPPE). I build local LLM pipelines, automated ETL, and interactive PowerBI reporting to turn raw data into business intelligence.

A LITTLE ABOUT ME

I'm a **Data & Quantitative Analyst** based in Jakarta, certified in **AI (CAIP)**, **Data Science (CDSP)**, and **Financial Market Analysis (WPPE)**. I work across the full data stack — from Linux/Unix server environments and automated shell scripting to end-to-end Python ETL pipelines and interactive PowerBI reporting.

My focus is on bridging **technical data engineering**, **AI-assisted development**, and **financial market analytics** to optimize business intelligence and operational workflows. I deploy local open-source LLMs (llama-server, Qwen) for private, high-throughput processing and use Claude Code workflows to accelerate prototyping.

I hold a double degree in **Business Administration & Economics** and an **ACCA Data Analytics** certification — a mix of technical and financial fluency I bring to every project.

📍 **Location**
Jakarta, Indonesia

🤖 **Specialty**
Local LLM & AI pipelines

📈 **Domain**
Financial market analytics

🐧 **Systems**
Linux (Ubuntu, Arch)

TOOLS & TECHNOLOGIES

A toolkit spanning programming, systems, data engineering, and AI infrastructure.

Programming & Scripting

Python (Pandas, NumPy, XGBoost, SKLearn) · SQL · Bash / Shell Scripting · JavaScript · Visual Basic (VBA) · HTML · Django · FastAPI

Linux & Systems

Linux Administration (Ubuntu, Arch Linux) · Server Automation · Git · Terminal / CLI Workflows

Data Engineering & BI

ETL Pipeline Design · Time-Series Ingestion · PowerBI · Data Visualization · MySQL / PostgreSQL · Plotly

AI & Local LLM Infrastructure

Local Model Deployment (llama-server, vLLM, SGLang, Qwen, Xiaomi MiMo) · Claude Code AI Workflows · Process Automation · CUDA · SYCL · ROCm · Voice AI (sherpa-onnx, pocket-tts, supertonic, fishaudio, STT/ASR/TTS)

Certifications

Certified AI Practitioner (CAIP) · Certified Data Science Practitioner (CDSP) · ACCA Data Analytics · WPPE BNSP

SELECTED WORK

Hands-on builds across AI infrastructure, quant finance, and document automation.

Freelance AI Photobooth Web App

`Python · Web Development · Image Models`

- Developed and deployed a custom faceswap photobooth web application as a freelance project, leveraging popular open-source image models for real-time processing and user interaction.

Local AI Pipeline & Document Processing Infrastructure

`Linux · llama-server · Qwen AI · Claude Code · Python`

- Configured local open-source LLM inference engines (llama-server, Qwen models) in a Linux (Ubuntu/Arch) workstation environment for private, high-throughput data processing.
- Utilized Claude Code CLI workflows to accelerate script prototyping and build automated local document processing pipelines.

IDX Intraday Quantitative Backtester & Data Pipeline

`Python · SQL · Pandas · REST APIs · Linux`

- Engineered an automated Python ETL pipeline to ingest, clean, and store 5-minute OHLCV price bars and institutional flow data for Indonesia Stock Exchange (IDX) equities.
- Developed a custom backtesting engine combining technical indicators with institutional transaction metrics to evaluate intraday strategy performance and risk-adjusted returns.
- Integrated automated screener outputs to generate daily analytics, reducing manual stock analysis setup time by over 70%.

Automated OCR Indexing & Document Parsing System

`Linux · Bash · Python · Regex · Server Automation`

- Built a server-based OCR data pipeline on Linux using Bash scripting and Python to extract, parse, and structure text from scanned enterprise certificates, forms, and financial documents.
- Implemented automated regex patterns and sorting logic to systematically organize unstructured PDF inputs into indexed database records.

WHERE I'VE WORKED

Data Scientist Manager

PT Neo Karya International · Jakarta, Indonesia · `Sep 2026 – Nov 2026`

- Deployed on-premise AI tools and analytics pipeline.
- Engineered and deployed interactive **AI-driven analytics dashboards** to deliver actionable, real-time insights directly to end-users.
- Integrated local open-weight Large Language Models (LLMs) such as **Qwen and Gemma** into data processing pipelines, ensuring secure, high-throughput, and private intelligence analysis.
- Bridged front-end dashboard visualization with backend local AI infrastructure to optimize user experience and data accessibility.
- Developed and deployed a **Retrieval-Augmented Generation (RAG) chatbot** and automated **voice caller AI system** (Python, LLMs, Voice AI), integrating advanced LLMs and voice synthesis/recognition tools.

Human Resources Intern

CIMB Niaga · Jakarta, Indonesia · `Feb 2023 – Mar 2023`

- Analyzed HR operational data to streamline internal administrative workflows and reporting accuracy.
- Assisted in tracking departmental metrics and maintaining structured employee data records.

Business Analyst Intern, Partnership Team — TMRW by United Overseas Bank (UOB) — Jakarta, Indonesia

Jun 2022 – Dec 2022

- Designed and deployed interactive **PowerBI dashboards** for internal executive stakeholders, enabling real-time monitoring of business partnership performance metrics.
- Maintained and optimized core **Excel data pipelines** and financial reporting models, improving reporting efficiency across daily, weekly, and monthly presentation decks.
- Collaborated with cross-functional teams to clean partner raw data feeds and reconcile transactional inconsistencies.

BACKGROUND

BSc Business Administration & BSc Economics

Institut Bisnis Nusantara / GS FAME — Manila International Double Degree

2023 – 2025

Diploma of Commerce

Deakin College, Jakarta

2019

Highest Achiever Award — Business Analytics & Law for Commerce

Certifications

- Certified AI Practitioner (CAIP) — CertNexus, 2021
- Certified Data Science Practitioner (CDSP) — CertNexus, 2021
- Certificate in Data Analytics — ACCA, 2021
- Data Analysis in Python — FreeCodeCamp, 2024
- Sertifikasi WPPE (Wakil Perantara Pedagang Efek) — BNSP, 2026
- Certificate in Sustainability for Finance — ACCA, 2022

LET'S BUILD SOMETHING WITH DATA.

I'm open to new opportunities in data, AI, and financial analytics. Reach out — I'd love to hear from you.
